SUMMARY

I am an enthusiastic, creative and hard-working designer with a varied and diverse background. I received my bachelor degree and master degree from two universities in Slovakia. During and after my study I started to gain experience in the areas of interior, furniture and product design.

My approach to design development is strongly focused upon the user's experience. I am able to manage a project from inception to installation. I enjoy turning a problem or a concept inside out and brainstorming with others to generate innovative and appropriate solutions.
